

# Bi Fold & French Door Magnetic Door Holders

The Attractive, Practical Solution to Stabilizing Bi-Fold, French Doors

# DN178 Bi Fold & French Door Magnetic Holders

Designed primarily for bifold doors, our simple magnetic door holders allow you to hold the swing/pass door to the adjacent panel. This creates a stable set of doors when all the panels are moved thus protecting users from harm and prevents components from damaging.

It also keeps the doors much more manageable in motion, ensuring no unnecessary strain is put on the rollers and hinges, and also eliminates any finger trap or motion hazard from a loose, swinging door.

Designed to be as unobtrusive as possible, the door holders are available in two sizes, 26mm and 61mm, and are available in a wide choice of colours to complement your doors.

## Features:

- Engineered from die cast zinc
- Available raw, to coat in any special colour
- 26mm & 61mm door holder has fixing plates on a 2 degree angle. The width of door panel & depth of the lever handle will determine where the premium position is to fix the holder. This ensures varying handle depths are catered for
- 40 N / 4 Kgf / 9 lbf retention force for the 61 mm holder
- 21 N / 2.1 Kgf / 4.7 lbf retention force for the 26mm holder
- Two door holders, one used at top, one at bottom will double the retention force for oversized doors
- A resilient polyurethane translucent pad cushions impact whilst also protecting surfaces from contact damage
- Central fixing point with additional anti-rotation grub screw
- Backplate design allows for rivet nut fixing if required. Ideal for Chambered Systems

## Technical Specifications

Material:	Die Cast Zinc
Stock Finishes:	Black Matte Brushed Satin Chrome Mill Finish
